

BBS Patient Day Event

The Brittle Bone Society Trustees and staff are pleased to once again be holding our Patient Day Events, for members in England to ensure they are fully included and up to date on health service delivery, provision of care, news on research, therapies and treatments.

The theme for this year's **Rare Disease Day** is 'Research' we feel this is so appropriate as it's the first year the Brittle Bone Society host our Scientific Symposium for Healthcare Professionals while launching our own Research Programme and announcing our entry to the AMRC (Association of Medical Research Charities). We will keep you apprised of any new programmes, trials or new projects that may be of interest.

Thank you to all the Healthcare Professionals who kindly supported this event and to the participants including friends from other groups.

Our thanks to the OIF in the USA for their assistance in supporting Professor Glorieux's participation at this event.

Thanks to Alexion Pharmaceuticals for supporting our Patient Day events for 2017.
